Pennsylvania Geological Survey

---

*COVER: A typical scene of a Pennsylvanian-age coal swamp. Such swamps were common throughout much of Pennsylvania about 300 million years ago. Vegetation accumulated, was buried, and later was converted to the bituminous and anthracite coalbeds mined in Pennsylvania today. The ancestral dragonfly in the foreground had a wingspread of about 2 feet. Drafted by John G. Kuchinski.*

## HOW TO ORDER PUBLICATIONS

Unless otherwise noted, **free publications, open-file reports, or reports marked by a double dagger (‡)** may be obtained from:

Department of Conservation and Natural Resources  
Bureau of Topographic and Geologic Survey  
P. O. Box 8453  
Harrisburg, PA 17105-8453  
717-787-2169

**Other publications** may be purchased over the counter (OC) or by mail (M) from:

Department of General Services  
State Book Store  
1825 Stanley Drive  
Harrisburg, PA 17103-1257  
717-787-5109

Add **6 percent state sales tax** to the price of all publications purchased over the counter or mailed to a Pennsylvania address, except those marked by ‡. Prices of publications marked by ‡ already include state sales tax. If an order is to be mailed to a foreign address, include an additional \$3.75 for postage and handling. **Optional insurance** is available for publications purchased by mail from the State Book Store; to guarantee the replacement of publications that are damaged or lost in transit, add 10 percent to the cost of each publication ordered. Make check or money order payable to **Commonwealth of Pennsylvania**. Stamps will not be accepted as payment. Order forms are included at the back of this book for your convenience.

## HOW TO OBTAIN TOPOGRAPHIC MAPS OF PENNSYLVANIA

Topographic maps of Pennsylvania are prepared by the U.S. Geological Survey in cooperation with the Pennsylvania Bureau of Topographic and Geologic Survey. Persons wishing to know the names and scales of topographic maps that are available for Pennsylvania should refer to **Pennsylvania—Index to Topographic and Other Map Coverage**. Names, dates, and prices of maps currently available are listed in **Catalog of Topographic and Other Published Maps**. Both of these publications are free upon request from either of the following agencies:

Department of Conservation and Natural Resources  
Bureau of Topographic and Geologic Survey  
P. O. Box 8453  
Harrisburg, PA 17105-8453  
717-787-2169  
<<http://www.dcnr.state.pa.us/topogeo/>>

U.S. Geological Survey Information Services  
P. O. Box 25286  
Denver, CO 80225  
1-800-435-7627  
<<http://www.usgs.gov>>

Topographic maps may be purchased from the U.S. Geological Survey at the address listed in the right-hand column above. Ordering information and order forms are included in **Catalog of Topographic and Other Published Maps**.

## THE GEOLOGICAL SURVEYS OF PENNSYLVANIA

There have been four geological surveys of Pennsylvania and four resulting series of publications:

**First Survey, 1836–1842:** Publications—6 annual reports, 2 quarto-volumes, and a state geologic map.

**Second Survey, 1874–1889:** Publications—81 volumes, 35 atlases, and 6 grand atlases.

**Third (Commission) Survey, 1899–1914:** Publications—6 biennial reports and 12 economic reports, some of which are listed in this book.

**Fourth Survey, 1919–** : Most publications (fourth series) are listed in this book. The list does not include superseded or replaced reports that are out of print.

All reports of the first three geological surveys and some of the reports of the present (fourth) survey are out of print.

## SOURCES OF OUT-OF-PRINT REPORTS

Many reports appearing in this list of publications are marked with an asterisk (\*), indicating that they are out of print and no longer available for distribution. Some reports are marked with a dagger (†), indicating that they are temporarily out of print and that new editions are in preparation. Out-of-print reports are available for study in many libraries throughout the state (see list on inside front cover).

The library of the Bureau of Topographic and Geologic Survey, Second Floor, Evangelical Press Building, 1500 N. Third Street, Harrisburg, telephone 717-783-8077, is open for public use and contains most of the Pennsylvania Survey reports, as well as many of the U.S. Geological Survey and other governmental and institutional reports related to Pennsylvania.

## BIBLIOGRAPHIES OF PENNSYLVANIA GEOLOGY

For a more comprehensive, annotated listing of publications dealing with Pennsylvania geology through 1979, including journal articles and nongovernmental publications, please refer to the following General Geology Reports published by the Bureau of Topographic and Geologic Survey: **G 34**, **G 42**, **G 61**, and **G 73**, listed on pages 10, 11, and 12 of this book.

For a complete listing of U.S. Geological Survey publications on the geology and water resources of Pennsylvania from 1879 to 1988, refer to **List of U.S. Geological Survey Geologic and Water-Supply Reports and Maps for Pennsylvania and New Jersey**. This publication may be purchased from U.S. Geological Survey Information Services, P. O. Box 25286, Denver, CO 80225, telephone 303-202-4700. The price is \$2.50 plus \$3.50 for shipping and handling; please make check payable to *U.S. Geological Survey*.

## MAP SCALES

Common map scales referred to in the list of publications and their equivalent distances are as follows:

SCALE	EQUIVALENT DISTANCE	SCALE	EQUIVALENT DISTANCE
1:6,000	1 inch = 500 feet	1:125,000	1 inch = approx. 2 miles
1:12,000	1 inch = 1,000 feet	1:250,000	1 inch = approx. 4 miles
1:16,000	1 inch = 1,333 feet	1:500,000	1 inch = approx. 8 miles
1:24,000	1 inch = 2,000 feet	1:380,160	1 inch = 6 miles
1:48,000	1 inch = 4,000 feet	1:1,000,000	1 inch = approx. 16 miles
1:50,000	1 inch = 4,167 feet	1:2,000,000	1 inch = approx. 32 miles
1:62,500	1 inch = approx. 1 mile	1:2,500,000	1 inch = approx. 40 miles

Other map scales cited in the list are followed by their equivalent distances.

## FORMAT, SYMBOLS, AND ABBREVIATIONS

The list of publications is arranged by series of reports in alphabetical order. Within each series, the reports are listed in numerical order. In the three-column format, the left column indicates the report series and number. The middle column contains bibliographic information such as the title, author(s), year of publication, number of pages, and number of plates. Also included in this column are notations of bedrock and surficial geologic maps, economic geologic maps, and other maps of particular interest, as well as the scales of the maps. The right column contains information on the printing status of each report and prices of reports that are in print. The abbreviations and symbols used in the right column are as follows:

ABBREVIATION OR SYMBOL	MEANING
*	Out of print (see "Sources of Out-of-Print Reports" at the top of this page)
†	Temporarily out of print; new edition in preparation
‡	Partial report (plates only); books are in press and will be available for purchase at a later date (see "How to Order Publications" on page 1)
OC	Over the counter (see "How to Order Publications" on page 1)
M	Mail (see "How to Order Publications" on page 1)

## MAPS

(Maps 16–19, 21–26, 28–37, 40, 46–47, 50–58, and 60 are out of print and have been replaced by a new series of 7.5-minute oil and gas base maps (1:24,000 scale). For ordering and price information, please contact A. H. Mathias and Company, Inc., 950 Penn Avenue, Pittsburgh, PA 15222, telephone 412-281-1800. When ordering the maps, please provide the 7.5-minute topographic map name of each map desired. An index to the available maps may be obtained by contacting the Bureau of Topographic and Geologic Survey, Subsurface Geology Section, 400 Waterfront Drive, Pittsburgh, PA 15222-4745, telephone 412-442-4235, between 8:00 a.m. and 4:00 p.m. weekdays.)

## INDEX TO PUBLICATIONS ON PENNSYLVANIA

This index is designed to help you find the publications in which you are interested and is divided into two parts, a county index and a subject index. When you have found a publication series and number (e.g., A 27), refer to the list of publications to find the title of the publication. The title will help you decide if the publication contains the specific type of information you desire. Publications covering the whole state or large portions of the state, such as Map 1 and EG 1, are not listed in the county index. Do not order publications from this index; refer to the list of publications for series, number, and title.

Much additional information on Pennsylvania geology is available in publications not covered in this list. The reader is referred to Pennsylvania Geological Survey General Geology Reports 34, 42, 61, and 73 for a more comprehensive list of articles on Pennsylvania geology written before 1979.

### Abbreviations used in this index are as follows:

Pennsylvania Third (Commission) Survey—Pa. Geol. Survey (3rd)

Pennsylvania Geological Survey, fourth series—Pa. Geol. Survey (4th)
